

Chipco® Green

Contains 255g/L (25%w/w) iprodione.

- ★ Contact action - rapid control
- ★ Very reliable turf fungicide
- ★ Rainfast in 1 hour
- ★ Excellent 'green up' properties
- ★ Reduces dew switching

Fusarium
Patch

Red Thread

Dollar Spot

Anthracnose

Leaf Spot

Rust

Diseases Controlled

CHIPCO® GREEN is and has been the UK and Ireland's No.1 contact fungicide for over 29 years. Tried and trusted by turf managers on some of the most prestigious turf around the world, CHIPCO® GREEN is a truly global player.

CHIPCO® GREEN includes 6 diseases, Fusarium, Red Thread, Dollar Spot, Anthracnose, Leaf Spot and Rust together with full approval for use on golf courses, lawns, bowling greens, cricket pitches, tennis courts and professional sports grounds/stadiums*. *See label for full details

Timing of Application

CHIPCO® GREEN can be used preventatively or curatively at the first signs of disease. CHIPCO® GREEN can be applied at any time of the year when grass is either dormant or actively growing and displays both protective and curative activity.

Rainfastness

CHIPCO® GREEN'S special liquid formulation is very 'rainfast'. Once the spray application has dried on the leaf surface, usually within 1 hour of application, rainfall will not interfere with its ability to control disease.

Switching

CHIPCO® GREEN can also prevent the build-up of morning dew on grass leaves for up to 2 weeks after application. 'Switching' to remove this dew is therefore usually unnecessary.

Mowing

CHIPCO® GREEN should be applied after cutting and further mowing should not take place until at least 24 hours after treatment.

Application rates

Add the required quantity of CHIPCO® GREEN to the half-filled spray tank with the agitation system in operation and then fill to the required level. Continue agitation at all times during spraying and stoppages until the tank is completely empty. Spray immediately after mixing. This aids the effective mixing for all fungicides.

For the control of Red Thread, Dollar Spot and Fusarium Patch and useful reduction of Anthracnose, Leaf Spot and Rust, use 20L/ha of CHIPCO® GREEN in a minimum of 400-500 litres of water per hectare of turf.

Recommended nozzles

ISO White 08F110 WH for knapsacks or power sprayers. ISO White DT 4.0 alternatively for knapsacks.

After use

Wash equipment thoroughly after use.

Disease Management

CHIPCO® GREEN can be applied as part of a disease management programme. It is a perfect partner for DEDICATE® and SCORPIO®.
