

Scorpio®

Now
approved in
Republic of
Ireland

Contains 500g/kg (50.0% w/w) trifloxystrobin.

- ★ Up to 56 days control
- ★ Rainfast in 2 hours
- ★ Effective in cool conditions
- ★ Preventative and curative activity
- ★ Small pack to reduce disposal costs
- ★ Top selling strobilurin fungicide in the US since 1999

Fusarium Patch

Red Thread

Disease Controlled

SCORPIO® has a revolutionary mesostemic mode of action, delivering highly efficient preventative and curative control of a broad spectrum of turf diseases including Fusarium and Red Thread in the UK and the Republic of Ireland.

Extensive global trials have shown that the following diseases are controlled by SCORPIO®:

- Fusarium Patch
- Red Thread
- Summer Patch
- Take-All
- Leaf Spot
- Rust
- Brown Patch
- Grey Leaf Spot

Do not apply during drought conditions or to frozen turf.

Timing of Application

Apply at the first sign of disease. SCORPIO® can also be used in a preventative control programme.

Rainfastness

Once the spray application has dried on the leaf surface, rainfall will not interfere with its ability to control disease, due to the locked in reservoir of protection being created. SCORPIO® has been proven to be rainfast within 2 hrs of application.

Application in low temperatures

SCORPIO® can be applied at low temperatures, as long as the contents of the tank/knapsack remain as a liquid, and that there is no snow cover.

SCORPIO® is an easy to use, water dispersible granule, supplied in a novel new pack. This makes measuring the granules highly accurate and greatly reduces operator exposure.

Mowing

SCORPIO® should be applied after cutting and further mowing should not take place until AT LEAST 48 hours after the treatment.

Application rates

Add the required quantity of SCORPIO® to the half-filled spray tank with the agitation system in operation and then fill to the required level. Continue agitation at all times during spraying and stoppages until the tank is completely empty. Spray immediately after mixing. This aids the effective mixing for all Fungicides.

Equipment	Area	Product Required	Water Volume
Vehicle mounted sprayer	1 ha	0.7 Kg	400 - 500 L
Knapsack sprayer	100m ²	7 g	4 L
	500m ²	35 g	20 L

Recommended nozzles

ISO White 08F110 WH for knapsacks or power sprayers. ISO White DT 4.0 alternatively for knapsacks.

After use

Wash equipment thoroughly after use.

Disease Management

SCORPIO® can be applied as part of a disease management programme. It is a perfect partner for CHIPCO® GREEN.

ALWAYS READ THE LABEL. USE PESTICIDES SAFELY.
(MAPP 12293) (PCS 02551)

PACK COVERAGE:

250g COVERS (APPROX.) 0.35 HA OR 35g COVERS 500m²
